Subject: Stop building more WMD

Hello,

I am a California resident and I am very concerned with the proposed increase in nuclear weapons in Livermore.

The last thing this country/world needs is more nuclear weapons. We have enough to destroy this world several times over. We (the USA) are the only ones who have used atomic weapons and we saw the mass destruction that caused.

You say we need "buster bunkers". So this sounds like the USA will be using these in the new future (why else would we build them). So when we use a nuclear weapon we open the flood gates of every country to use nuclear weapons when ever they want.

1/02.01

I am scared, if our country continues on the path it is now. We will be in a state of continous war. We need to be the leaders in the world and stop making new WMD and start destroying the ones we have.

How many people you think making this decision to make more Nukes, would like it done next to there house and family. Not to mention the mass murder these weapons cause, could you really sleep at night knowing you were the one that approved the killing of millions of men, women, and children.

sincerely,  
James Hirt  
Pleasanton, CA

Dear DOE:

Here is my comment on the draft Site-Wide Environmental Impact Statement on Livermore Lab operations over the next ten years. The SWEIS calls for major increases in nuclear weapons design and manufacture. New plutonium activities include: raising the inventory from 1,540 pounds to 3,300 pounds; tripling the amount "at risk" at one time; creating prototype bomb cores for a new "Modern Pit Facility;" fissioning plutonium in the NIF mega-laser; and, vaporizing plutonium oxide on-site to separate isotopes. The SWEIS also reveals plans to increase the "at risk" limit for radioactive tritium 10-fold.

1/01.01 | I oppose these actions in the SWEIS that will  
2/04.01 | increase nuclear proliferation and damage our  
3/07.01 | environment. I call on you to analyze conversion  
of the Lab to peaceful purposes as an alternative.

Signed: *Esther M. Ho, 2144 Shaver*

Mr. Tom Grim  
 Department of Energy, NNSA, L-293  
 7000 East Ave.  
 Livermore, CA 94550

Dear Mr. Grim:

- 1/04.01 | I object to the Department of Energy's plan to double the limit for plutonium at Livermore Lab from 1,540 pounds to 3,300 pounds. I object to the making of any more nuclear bombs at Livermore Lab. I object to a project called Plutonium—Atomic Vapor Laser Isotope Separation. This is a health risk and a nuclear proliferation nightmare.
- 2/37.01 | I object to the Livermore Lab being used as a place to produce plutonium pits for nuclear weapons. As planned the Modern Pit Facility could produce 150-450 plutonium bomb cores annually, with the ability to run double shifts and produce 900 per year.
- 3/26.01, 26.03 | This plan will add Plutonium, highly-enriched uranium and lithium hydride to experiments in the National Ignition Facility megalaser when it is completed at Livermore Lab. Using these materials in the NIF will increase its usefulness for nuclear weapons development. It will also make the NIF more hazardous to workers and the environment.
- 4/26.04 | This plan will allow the manufacture of Tritium Targets for the NIF megalaser on site at Livermore Lab. Livermore Lab has a history of tritium accidents, spills and releases.
- 5/39.01 | This plan also call for Livermore Lab to develop diagnostics to "enhance" the nation's readiness to conduct full-scale underground Nuclear Tests. There should be no more testing of nuclear weapons.
- 6/01.02 | This plan proposes genetic modification and aerosolization with live anthrax, plague and other deadly pathogens. This could weaken the

Comments on the SWEIS for the Lawrence Livermore National Laboratory for the next ten years:

- 1/01.01 I have followed the activities and development of the Lawrence Livermore National Laboratory (LLNL) for several years. The present plan of the U.S. Government for the next ten years is not only appalling but is in defiance of the U.S. Constitution, Article VI; Section 2:
- "...all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land;..."
- Any plan to expand the U.S. nuclear arsenal through experimentation and manufacture of required parts (plutonium pits) is not only further endangering civilization as we now know it but is illegal by Treaties signed and ratified by the U.S. Government.
- 2/23.04 Has this Government even begun to compensate workers suffering the ill effects of their labor at LLNL? Why would they want to endanger additional workers or the surrounding environment?
- 3/07.03 For the sake of humanity, I urge the U.S. Government to close this facility and clean-up the present contamination with the funds sought for this ten year plan.

Sincerely,

Sister Jackie Hudson, OP

Subject: Environmental Impact Statement

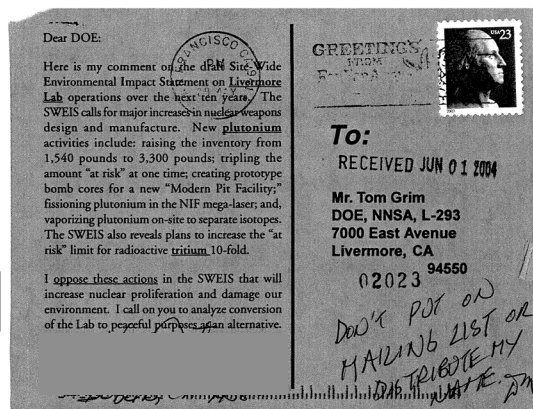

Dear Mr. Grim,

- 1/04.01 I live in Mountain View, on the peninsula, with my two boys aged 7 and 2, and my husband. We live near Moffet Field. My parents live in Stockton, and have become concerned about the radiation levels at Livermore Lab. They forwarded me the information about the proposed expansion of Livermore Lab from Tri-Valley Cares which I found distressing to read. I don't know what's worse - the plans to build 900 atomic bomb cores, or the biowarfare plans.
- Words fail me. Our country has gone down the wrong road. These plans for the expansion at Livermore Lab send us even farther down the terrible path which leads only to more violence, destruction and death.
- The normal functioning of government is becoming surreal: an environmental impact statement for the manufacture of 900 plutonium bomb cores?
- 2/07.01 Help us wake up from this living nightmare. Convert Livermore Lab into a research facility for alternative forms of energy. Humanity has had enough of violence, destruction, death.
- With best wishes,
- Siri Huntoon

Livermore, CA 94550
- Dear Mr. Grim:
- Since I cannot attend the public hearings in Livermore and Tracy (or in Washington, D.C.) April 27-28 +BP, I am sending a written comment re: Livermore Lab:
1. I protest the proposal to up the plutonium limit at Livermore - we don't need more nuclear bombs. We must reduce what we have.
  2. I am against reviving the once cancelled plutonium atomic isotope separation project. This would be a 3-fold increase, and a great health risk - "no" to this nightmare.
  3. Livermore Lab should NOT be used to test new technologies for producing plutonium pits. We should not be producing more bomb cores at all.
  4. Adding plutonium, enriched uranium and lithium hydride to work in the National Ignition Facility megalaaser must be stopped. NIF would become even more hazardous to the environment, neighborhood, and facility workers.

Joan

- 6/39.01 5. *Topps any plan to resume under-ground nuclear tests.*
- 7/35.01 6. *Mixing pathogens and nuclear weapons activities at Livermore Lab is a terrible plan - this puts everyone in the Bay Area at risk. I oppose turning Livermore into a bio-weapon agent facility. What would happen to the international biological weapons treaty intended to eliminate these horrible killers?*
